TRANS-USE
Interdisciplinary and international summer school

10/24.7.2019
Toolbox Coworking
Turin

TRANS-forming industrial legacy.
Spatial and economic models of re-USE

The summer school aims to share, in an international comparative framework, innovative approaches and tools for the synergistic design of financial instruments, environmental recovery procedures and urban master planning operating in complex market conditions on large-scale obsolete industrial sites that embody controversial legacies.

Participants will focus on the analysis of case studies of urban industrial legacy and urban production transformation. They will be asked to develop a toolkit (in terms of architecture, urban planning, landscape design, management, environmental and economic sustainability) and present it publicly at the end of the summer school.

CALL FOR ADMISSION
– 8 motivated BA-MA students from Politecnico di Torino – no tuition fees
– 6 motivated BA-MA students from Technion – no tuition fees
– 6 motivated BA-MA students from Tsinghua University – no tuition fees
– Max 5 motivated BA-MA students from other Institutions – fee 500 EUR

The scientific committee will select participants among all applicants based on the following criteria.

REQUIREMENTS
– To be enrolled within the current academic year.
– Good knowledge of the English language.

EVALUATION CRITERIA
